- Vita Suprinity Veneer
- Metal Frame & Dentures
- All on 4

ABOUT US

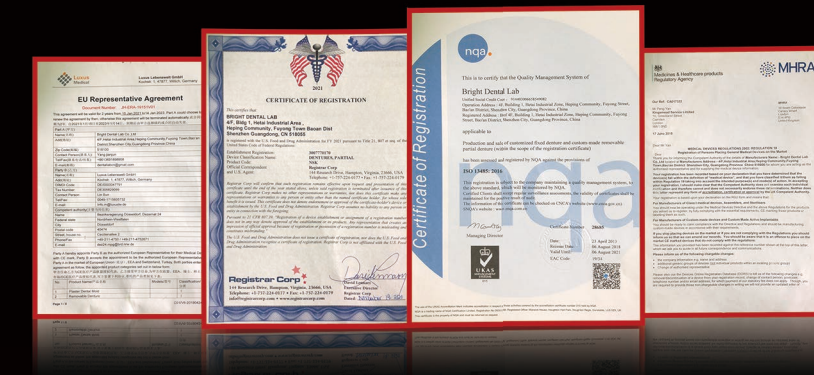

If you are, or have you ever considered “out sourcing” your work, I would like to introduce to you, **Bright Dental Laboratory**. Bright Dental Lab was established in 2007, a manufacturer laboratory, in a beautiful coastal city of Shen Zhen, China.

Shen Zhen happens to be located right next to Hong Kong, which gives it a major advantage in a business that relies on shipping and receiving from international clients. The reason is that Hong Kong is not affected by all the Chinese holidays. This means that cases can be shipped or received even during a holiday,

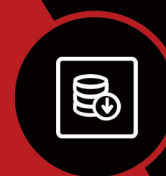

which would close other city Customs Offices.

Bright Dental Lab has approximately 200 employees and is still growing. We serve many clients from the US as well as Europe. Bright dental Lab is registered with the **FDA** and has an **ISO 13485** registration for our European market.

As the Arun Sarin says that A brand is what a brand does. So we have a dream that we can provide the best products and service to all the world. If you have any questions or need more information, please contact us.

We can produce cases from traditional impressions as well as from digital files (which typically reduces turnaround time by at least a day). Normal turnaround time is about seven to eight days (calendar days as opposed to business days).

Prices may vary depending on volume, but are usually significantly cheaper than doing it “in house”, without the hassles of managing many employees, and worrying about inventory or maintaining equipment. Put an end to worrying about over-time, sick leave, finding technicians, maternity leave, holidays ETC.

You are never worried about the quality of our work. It doesn't matter what I claim our quality is, because everyone has an opinion, and at the end of the day, it is still just an opinion. The only way to see if we can meet your quality standard is for you to try us, and see for yourself. We won't even charge you to give us a try on your first three units. In other words, you be the judge.
